Metropolitan Management Kallidaikurichi Chidambarakrishnan Sivaramakrishnan,Leslie Green,1986 This is a study of the management problems experienced by selected metropolitan cities in South and East Asia and of the approaches adopted in resolving them. Although the region contains many of the world's developing countries, it is not an exception to the universal trends in urbanization, which have had a massive impact on its metropolitan cities. Apart from Tokyo, the cities concerned tend to dominate the economic and political scene in their respective countries, but for the purposes of this discussion it is not inappropriate to refer to them and the problems they face as being broadly metropolitan. Urban geographers and planners now tend to use the term 'metropolitan' to refer to a large identifiable area of continuous urbanization consisting of several administrative jurisdictions. Demographers today often classify cities with populations of more than one million people as metropolitan, and in common usage the term is widely employed to symbolize social, economic, and political status. All of these characteristics apply to the cities studied here.

Typography and Motion Graphics: The 'Reading-Image' Michael Betancourt, 2018-11-20 In his latest book, Michael Betancourt explores the nature and role of typography in motion graphics as a way to consider its distinction from static design, using the concept of the 'reading-image' to model the ways that motion typography dramatizes the process of reading and audience recognition of language on-screen. Using both classic and contemporary title sequences—including *The Man With the Golden Arm* (1955), *Alien* (1979), *Flubber* (1998), *Six Feet Under* (2001), *The Number 23* (2007) and *Scott Pilgrim vs. The World* (2010)—Betancourt develops an argument about what distinguishes motion graphics from graphic design. Moving beyond title sequences, Betancourt also analyzes moving or kinetic typography in logo designs, commercials, film trailers, and information graphics, offering a striking theoretical model for understanding typography in media.

Handbook of Party Politics Richard S Katz, William J Crotty, 2006-01-05 'This thoughtful and wide-ranging review of parties and party research contains contributions from many of the foremost party scholars and is a must for all library shelves' - Richard Luther, Keele University 'The study of political parties has never been livelier and this genuinely international Handbook - theoretically rich, comparatively informed, and focused on important questions - defines the field. This volume is both an indispensable summary of what we know and the starting point for future research' - R K Carty, University of British Columbia 'Political parties are ubiquitous, but their forms and functions vary greatly from regime to regime, from continent to continent, and from era to era. The Handbook of Party Politics captures this variation and richness in impressive ways. The editors have assembled an excellent team, and the scope of the volume is vast and intriguing' - Kaare Strom, University of California, San Diego Political parties are indispensable to democracy and a central subject of research

and study in political science around the world. This major new handbook is the first to comprehensively map the state-of-the-art in contemporary party politics scholarship. The Handbook is designed to: - provide an invaluable survey of the major theories and approaches in this dynamic area of study and research - give students and researchers a concise 'road map' to the core literatures in all the sub-fields of party related theorizing and research - identify the theories, approaches and topics that define the current 'cutting edge' of the field. The Handbook is comparative in overall approach but also addresses some topics to be addressed in nationally or regionally specific ways. The resulting collaboration has brought together the world's leading party theorists to provide an unrivalled resource on the role of parties in the pressing contemporary problems of institutional design and democratic governance today.

Non-declarative Sentences Richard Zuber, Ryszard Zuber, 1983-01-01 Non-declarative sentences such as interrogatives, imperatives and exclamations are analyzed together as a single class. The author gives a general characterization of all three types and shows that there are no other types of non-declarative sentences. Definitions are offered for the notions of declaration and presupposition. These definitions are applicable to all types of sentence, both declarative and non-declarative. A defining characteristic of non-declarative sentences is that only strongly intensional operators can apply to them to form complex sentences. It is shown that this property of non-declaratives implies that such sentences do not have declarations. A particular case of the relation between questions and conditionals is studied in more detail.

Gotong Rojong Koentjaraningrat, 2009-07 One of the most important, and at the same time most abused, terms in the Indonesian language is gotong rojong. Originally its usage was confined to the village sphere of Indonesian society, but during the past decade it has acquired an increasing currency among Indonesian political leaders and economic planners concerned with national problems. More and more frequently it has been employed in the formulation of prescriptions for, social and political relationships transcending the village level. In most cases, its usage, whether pertaining to activity at the village or national level has been vague and certainly varied, few writers (scholars or political leaders) pausing to give it

anything approaching a clear definition. Where it has been defined, this has all too often been largely in terms of ideological requirements rather than reflecting the actual practices, such as those that Dr. Koentjaraningrat describes. This is one of the very few studies of this important process in Indonesian society to be based upon careful field research, an investigation undertaken by Dr. Koentjaraningrat in Central Java in 1958 and 1959. Publication of his monograph reflects the Cornell Modern Indonesia Project's interest in the considerable changes that have taken place at the village level in Indonesia as a consequence of the impact of three and a half years of Japanese occupation, four years of struggle for independence, and the subsequent decade of rapid social, economic, and political movement. We feel that Dr. Koentjaraningrat's study is a significant addition to the all too meager store of data based upon actual field work at the village level in the post-war period. Finally, I should like to express our deep gratitude to Mrs. Claire Holt for her translation of the manuscript, one which is fully sensitive to the nuances of Dr. Koentjaraningrat's exposition. - George McT. Kahin December 8, 1961
